

NOTICE OF PARTICIPATION

Training Course – GREEN Project Energy comMunity Accelerator

The Union of Municipalities of Grecia Salentina (UCGS), within the framework of the European project GREEN – GRowing participative models for EnErgy commuNities, funded by the Interreg IPA South Adriatic Programme, is promoting a free training course aimed at citizens, businesses, public administrations, and third sector organizations. The goal is to provide theoretical and practical tools for the establishment and management of Renewable Energy Communities (RECs).

WHAT IS THE GREEN PROJECT?

The **G.R.EE.N. project** aims to develop participatory models for the creation of **Energy Communities** across Southern Italy, Montenegro, and Albania, to collectively address the challenges of energy efficiency, energy poverty, and environmental sustainability. Through training, cross-border cooperation, and shared design, GREEN seeks to build local communities capable of producing, sharing, and managing renewable energy, while promoting social cohesion and a transition toward a low-carbon economy.

© COURSE OBJECTIVES

- Explore the legal, technical, and financial framework of RECs
- Present possible management models and legal structures
- Provide practical examples and tools for local implementation
- Encourage the active participation of citizens and stakeholders

COURSE DURATION AND LOCATION

May 26–30, 2025 – 30 hours total

The training location will be communicated to registered participants.

The program includes lectures, thematic workshops, practical sessions, and site visits.
